PROJECT

Guest Accommodation for a property

PRODUCT

QUICKBUILT
HOME SYSTEMS®

DESCRIPTION OF JOB

Our clients were after some extra space to accommodate guests. Since they were able DIYers, they were after a flat pack kit home they could build themselves to save costs.

Quick Built Homes were chosen because not only did they like the attractive finish and the architectural design, they were impressed that the homes are made out of 'SIPS' panels that have a fully insulated core keeping you warmer in winter and cooler in summer which will save them heating and cooling costs.

Quick Built Modular Homes come in fully engineered, pre-cut Flat Pack Kits including all fixings required for your project. The panels simply click together like lego, meaning you can build your home in a matter of days.

Please watch our short 4 minute video on youtube to see how easy it is to install a 'Quick Built Home'
